As a proudly Australian operated family company, Kincrome continues to source new and innovative products, always expanding into new ranges of 'Professional' quality tools and equipment that comply, meet or exceed Australian and International standards.

Kincrome continues to lead the market in Digital & e-Commerce from our website, providing Online Accounts for our customers – enabling customers to access information such as Pricing & Availability, Tracking & Placing orders, viewing invoices, making payments and more! Our online services consistently bring our customers up to the minute information providing easy to find information, customer service and product support.

This year, we are pleased to release the Kincrome EZI-Pay Credit Plan for trade customers, a simple way for ABN holders to manage cash-flow when spending over $1500 on Kincrome Tools & Equipment. In 2016, the Kincrome brand also celebrates its 40th year anniversary and we look forward to celebrating this with you.

We trust the 2016 edition of the Kincrome Product Guide will prove a valuable resource and encourage you to visit our website and store owners to sign up for a Kincrome Online Account for the latest up-to-date product information. As always, we welcome your feedback and invite you to visit us at our Head Office in Scoresby Victoria, or at our Queensland or Western Australian warehouses.

KINCROME LOK·ON

LOK·ON sockets drive the side of the fastener using a subtle cam in the 6 point socket design.
This not only provides increased strength but also avoids the rounding of rusted or damaged fasteners. This design also enables the user to effectively loosen up to 85% rounded fasteners.

Conventional Socket

LOK·ON Socket

LOOSENS UP TO 85% ROUNDED FASTENERS

Quick Release Ratchet
The push button quick release feature ensures that the socket is locked securely while in use, but also allows for easy removal or quick change of socket even with greasy or oily fingers.

SOCKET SETS & ACCESSORIES

Peripheral Drive

Conventional sockets are made to the shape of the fastener and may break or 'round-off' edges when pressure is applied. Kincrome sockets with Peripheral Drive provide greater torque by relocating the load to the stronger flat sides of the fastener and redistributing the pressure to stronger parts of the socket. This feature, combined with a greater surface area contact, improves torque and prevents 'rounding off' of the fastener.

- **Featured on all Mirror Polish Sockets**

PeripheralDrive

MIRROR POLISH

LOK-ON Sockets

LOK-ON sockets drive the side of the fastener using a subtle cam in the 6 point socket design. This not only provides increased strength but also avoids the rounding of rusted or damaged fasteners.
*Exclusive to LOK-ON Sockets

LOOSENS UP TO 85% ROUNDED FASTENERS

Quick Release Ratchet

The push button quick release feature ensures that the socket is locked securely while in use, but also allows for easy removal or quick change of socket even with greasy or oily fingers.

- **Featured on all Kincrome Ratchets**

LOK-ON Individual Universal Joints

- Allows a smooth action compared to standard Universal Joint which has the tendency to bind under large angle operation
- Includes LOK-ON feature, which allows the socket to stay securely attached to the Universal Joint, with a quick release button to remove socket after operation
- Smooth action & high power transfer with maximum access to the fastener
- Up to 45° operating angle

KINCROME SOCKETS
Greater Strength & Durability Kincrome **LOK-ON** sockets use higher grade 6142 Chrome Vanadium alloy steel with increased carbon & alloy elements (vs 50BV30)

THINNER WALLS
For improved access to recessed fastener heads

SMOOTHER FINISH
Precision grounding & outside trimming for smoother finish (competitors go to partial trimming)

EASY TO CLEAN
- Chrome plate finish for corrosion protection
- Easy to keep clean

LONGER LIFE & REDUCED BREAKAGE
- Single punch construction reduces weakness under pressure
- Kincrome torque is 200% of DIN versus standard competitors at 130%
- Sockets meet DIN 475, DIN 3121 & DIN 3120 International Standards

KINCROME LIFETIME GUARANTEE

Kincrome Tools & Equipment guarantees these products against faulty workmanship and materials. Kincrome Tools & Equipment will, at their discretion, repair or replace faulty products free of charge. This guarantee does not cover products that have been altered, misused, abused or subjected to normal wear and tear. - *Conditions Apply.*

PROTECTING YOUR INVESTMENT

General Maintenance:

All Kincrome tools have been thoroughly treated to our specifications & standards with comprehensive corrosion protection process to preserve & prolong the life of your investment, however without the correct maintenance they are not imperishable.

Tools, like anything require maintenance, they need to be regularly wiped clean, especially of corrosives, such as petrol, solvents, antifreeze, brake fluids & of coarse water.

Keeping your tools in a closed tool box will also help protect them from external elements, for example, dust covered tools will rust quicker when the humidity is high or there is moister in the air as the dust will hold the moisture & potentially have a corrosive effect on metals.

Damaging the corrosion protection on your tools by dropping them, scratching or denting the chrome plating will expose the bare metal and likely cause accelerated corrosion.

Light surface rust on tools that are used infrequently is not uncommon as the natural oils in on your skin & oil's within the workshop actually help protect the tools.

Light rust should be cleaned from your tools immediately with a clean cloth & a product such as WD40.

Kincrome recommends that you wipe your tools clean of all foreign materials after use.

Ratchet Maintenance:

Ratchets are a precision instrument and require regular maintenance to ensure the lifetime warranty and to avoid injury or damages.

A guide to suitable Ratchet maintenance:

- Wipe all foreign materials from your ratchet - daily
- Check backing plate screws are tight to ensure no debris is entering your ratchet head - weekly
- Ratchet head should be disassembled, cleaned and soaked in a solvent to remove dust & grime build up- Heavy Use Monthly - Light Use Quarterly
- Whilst servicing your ratchet, unsure you check the main drive gear & the pawls for signs of wear or damage.
- Any worn components must be replaced, contact your Kincrome distributer for a suitable repair kit.
- ALWAYS lightly grease your ratchet gears after the service before re-assembling your ratchet - do not overload with grease.
- ALWAYS use a thread locker such as LOCTITE on all screws when re-assembling your ratchet.

Detailed repair videos for most models are available on the Kincrome You Tube channel - **https://www.youtube.com/user/kincrome**

Do not hesitate to contact Kincrome Customer Service with any further questions on how best to maintain your Tools & Equipment.

SPANNERS & SPANNER SETS

Kincrome Spanners

The range of Kincrome Spanners which has undergone exhaustive independent testing, is now 80% stronger than the ASME (American Society of Mechanical Engineers Standard) and 130% stronger than the German DIN standard.

The stronger, lighter and greatly enhanced quality of the Kincrome spanner range leaves many name brand competitors in its wake.

Features include a thinner head allowing the spanner to reach tighter areas, a rounder shaft for a more comfortable grip when applying greater torque, a lighter weight, and the shorter length decreases radial movement by up to 20%.

Construction of the range is from forged Chrome Vanadium Steel (Cr-V) hardened, tempered and chrome plated with a slight satin finish for corrosion protection. Increased Molybdenum Manganese and Nickel content provide greater strength and corrosion resistance.

There are two types to choose from - Premium Quality 'Euro' style Satin Finish, and the 'US' style Mirror Polish Range.

KINCROME GEAR SPANNER RANGE

The Kincrome Gear Spanner has all the benefits of standard spanners and more

With 72 teeth, the strong fine gear ratcheting ring end needs as little as 5° of sweep to move a fastener, a standard fixed ring end needs a minimum of 30°, or 6 times the area.

The narrow and thin head, combined with fine gear tooth design makes the Kincrome Gear Spanner suitable for working in tight and hard to access areas where a ratchet and socket will not fit.

There are 7 different Gear Ratchet models available together with colour coded packaging for ease of identification.

All Gear Spanner Sets include a handy Plastic Storage Case, ideal to store in a tool box or to carry to the job.

KINCROME SATIN FINISH SPANNERS

The Satin Finish range of premium spanners are manufactured from **Chrome Vanadium** (Cr-V), with increased Molybdenum Manganese and Nickel to provide greater strength and corrosion protection.

Featuring a Satin Finsh for greater durability, the 'Euro style' spanner is shorter than traditional spanners and offers a thinner head for hard to reach areas.

The Satin Finish range of premium spanners meet and exceed international ASME and DIN standards and are available in Combination, Ring and Open End.

- Forged from Chrome Vanadium steel, hardened, tempered, chrome plated and polished for corrosion protection
- Ring and jaw offset at 15˚
- Thinner head for hard to reach fasteners
- For heavy duty application
- Increased torque capacity
- Exceeds international ASME & DIN standards

PLIERS & WRENCHES

KINCROME PLIER & RIVETER RANGE

The extensive Kincrome and Supatool Plier range includes conventional combination, long nose and diagonal cutting pliers.

These popular pliers are designed to suit Australian workplace conditions. Forged from high carbon steel and tungsten high frequency treated, these pliers are built to last and are covered by the exclusive Kincrome Lifetime Guarantee.

In addition to the conventional plier range, Kincrome also offer a comprehensive range of Riveters and additional pliers to suit most applications, such as Multi-grips, Lock Grip Pliers, Linesman Pliers, Cable Cutters, Wire Strippers, Circlip Pliers, Tin Snips, Crimping Tools and more.

The Circlip Pliers come in external and internal straight jawed and bent jawed variations.

The range includes the flag tip 175mm and 125mm mini duty ratcheting options are also available with inter changeable heads.

The Kincrome Plier grips are comfortable even under extreme hand pressure.

This means the user can repeatedly apply greater force to the work piece through the hardened jaws and cutting edges without muscle fatigue.

The Kincrome comprehensive Riveter Range includes a hand and Pivot head riveter, a short arm, long arm and lazy tong riveter, plus a nut riveter set and a range of rivet nut inserts.

KINCROME WRENCHES

ADJUSTABLE WRENCHES

15˚ Offset provides greater leverage, compared to traditional 22.5˚ Offsets, reducing hand and arm fatigue.
The smaller offset also increases speed and precision in manoeuvrability of the fastener.

PRECISE MEASUREMENT

Super strong, precise in-house manufactured knurl with subtle chamfering on both ends enables easier turning with more safety – no sharp edges to hurt fingers.

Knurl engagement fixes the opening, making it unlikely to change between uses, unlike a standard wrench where constant adjustment is required.

GREATER JAW WIDTH

18-25% wider jaw opening compared to standard models for increased use with a larger range of fastener sizes.

USER FRIENDLY

Non-protruding on the movable jaw end. This allows greater ease of use in tight spaces.

STRONGER HANDLE

60% thicker handle provides a more comfortable hand fit. Ergonomically designed handle makes it easy to apply force without any pain when grasping the handle.

Repair Kits available.

MEASUREMENT SCALE

Uniform machined face with etched metric measurement scale allows the operator to measure and scale fasteners whilst in operation.

MANUFACTURED TO KINCROME STANDARDS & SPECIFICATIONS

Made from Drop Forged Chrome Vanadium Steel, nickel plated. Because of its hardness, great tensile strength and torque ability, Chrome Vanadium Steel is used in the production of many other hand tools.

Exceeding international standards, including:

ISO 6787-1982,
ASME B.107.8M-1996,
BS 6333-1995,

- **Kincrome Merchandiser** boards are based on a space saving, modular system which utilises every square centimetre of your display area to the maximum. Each board is 600mm in height and comes in widths of either 300mm, 600mm or 900mm. With multiple combinations you can have a single board or link several together to make a stunning display.
- Manufactured from heavy gauge steel, each board is Kincrome blue and powder coated for rust/scratch resistance. As well as the part number and description, each product has its silhouette printed on the board for easy recognition when the display needs to be restocked.
- For ‘easy set-up’ and uniformity with existing retail displays, standard pegboard hooks are used for each merchandiser.

15" Diameter Pad Protects Floors & Work Area from Messy Oil Splatter

Insert 15" diameter pad in funnel or oil pan before oil change, to eliminate oil splatter. Porous material allows fluid to quickly pass through into funnel or pan. Pad material resists engine oil, transmission fluid, coolant, brake fluid, brake cleaner, gear oil and other solvents. 15" fits all standard oil lift drain funnels and oil pans. Pad can be trimmed for perfect fit. Important: Not for coolants or fluids that will be recycled in the vehicle. Material fibers may contaminate the fluid.

THREADED OIL/TRANSMISSION FUNNEL

Hands-Free filling on Threaded valve cover openings

Two-piece design can be used separately or threaded together for a long super funnel. The larger section screws into threaded oil filler openings, found on many Ford, Dodge, Jeep & Chrysler cars, mini vans & SUVs. This holds the funnel upright for quick, mess free oil fills. Also works on some Honda and Nissan vehicles. The diameter of the smaller funnel is narrow enough to fit even the smallest applications including transmission filler holes

The Kincrome Hammer Range is a 'big hit' with the trade! The 20oz (567gm) Hickory Shaft **Claw Hammer** is 345mm long and used for general carpentry work and nail pulling. It is the most popular style in the hammer range, ideal for the trade professional and great for the handyman.

The Ball Pein Hammer with the classic Hickory Shaft is used for riveting, centre punching and bending or shaping soft metal.
Available in 8oz, 16oz, 24oz, and 32oz sizes.
Features:
- Forged from high carbon steel, hardened and tempered, precision ground, polished head with chamfered edges.
- American straight grained hickory handle with rubber end cap and twin handle wedges.

The Club Hammers are heavy duty industrial strength hammers constructed from carbon steel. These hammers are ideal for striking masonry nails, steel chisels and masonry drills. Available in 3lb and 4lb sizes. This range also includes the 4lb extra-long handle for when extra leverage is required. With a drop-forged, precision ground head these hammers feature chamfered edges and are securely anchored. Like all hammers in the range the club hammers also feature Kincrome's extra tough American hickory handle.

The **Soft Face** & **Dead Blow Hammers** complete the range. The Soft Face Hammer is typically used to form sheet metal or when a softer blow is called for to minimise damage. The Dead Blow Hammer is a specialised mallet with shot filled nylon heads to control the striking force with minimal rebound.

WORKSHOP & ENGINEERING

WORKSHOP & ENGINEERING RANGE

Kincrome Bench Grinders and Drill Press

Products in the Kincrome Workshop & Engineering range include **Bench Grinders and a Bench Mounted Drill Press.** The bench grinders come in 2 sizes; 150mm, 200mm, both with a flexible LED light. They feature perspex safety guards, adjustable tool rests and come with fine and coarse silicon carbide stones.
A heavy duty bench grinder stand is also available.

WET & DRY VACUUM RANGE

The range includes 20, 30, 50 and 80 litre size vacuums with motors ranging from 1000-1400W. The larger, industrial sized 80 litre vacuum has twin 1000W motors, that can be switched on/off individually depending on your vacuum needs.

The range features tough stainless steel tanks, 1.5 to 2.5 metre flexible suction hoses (depending on model) for further reach and 5 metre power cables so you can move around with ease. The 20 and 30 litre include a blower port which is ideal for blowing, general cleaning, inflating mattresses and other inflatable products.

The vacuums also include sturdy plastic bases with swivel castors for easy manoeuvrability. Accessories (including a floor nozzle, dust brush and crevice nozzle) are all neatly housed within the vacuum base.

The 20, 30 and 50 litre vacuums include 2 stage filtration to remove as much dust and debris from the exhausted air during use. Both the 30 and 50 litre models also include an accessory power socket on when using as a dust extractor for power tools.

Ideal for workshops or on the work site, the range of wet and dry vacuums are designed to suit commercial, industrial and domestic requirements.

INDUSTRIAL FAN RANGE

The new range of Kincrome fans are in many ways different to that of a standard fan. Many of the fans are five blade in construction compared to the traditional 3 blade construction of other fans currently in the market.

The Kincrome fan range includes ventilators, drum fans, pedestal fans, pedestal drum fans, wall fans, floor fans, 3 in 1 (wall, floor & ceiling mountable) and a unique 500mm (20") internal oscillation fan.

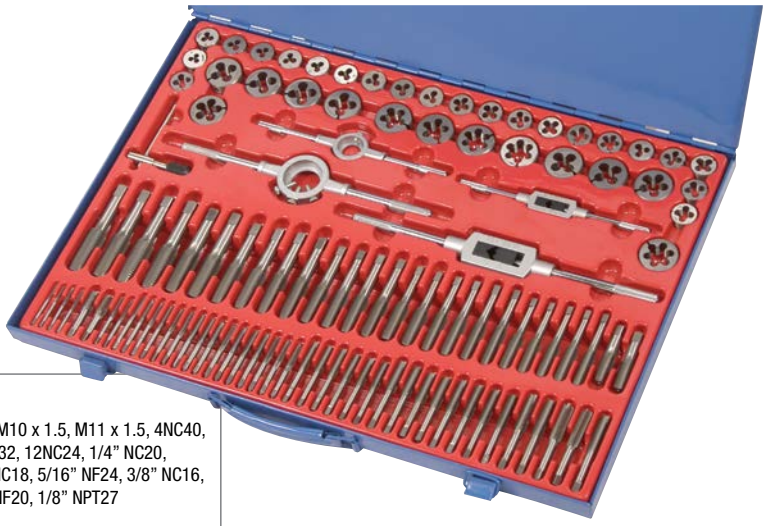

Fans ranging in size from 500mm (20") to a huge 900mm (36") in diameter should ensure that Kincrome has a fan suitable for your application.

The new fan range are heavy duty in construction, comply to all Australian standards and requirements including tropical climate class T. They also include a 12 month warranty and in many cases the fans are fully assembled ready to use straight from the box.

The Kincrome pressure washer range consists of a 6.5HP, 7HP petrol engine models, 11HP diesel model and two new electric models 1400W and 2000W.

The petrol and diesel models include a robust steel frame with puncture proof rubber wheels which are ideal to take to the job site.

Other features include high pressure hose with a convenient storage hook, heavy duty professional trigger guns with safety lock, plus each unit comes with a range of colour coded spray and pressure nozzles to suit different applications.

Kincrome Pressure Sprayers

Kincrome's range of Pressure Sprayers are ideal for a range of agricultural and automotive uses, designed and manufactured for trade or home.

There are four models to choose from - the 2 litre Hand Sprayer, the 5 and 8 litre Sprayers and the professional 15 litre Back Pack Sprayer for heavy duty use.

The 2 litre Hand Sprayer is a pump action sprayer ideal for carrying in the hand for small to medium size applications. The 5 and 8 litre Sprayers feature a plunger pump, include a 30cm brass lance with trigger lock, 1.3 metre braided hose, pressure release valve and a handy adjustable carry strap. The 15 litre Back Pack Sprayer on the other hand features a lever pump handle, which can be fitted to either the left or right side of the tank, a fibreglass / aluminium telescopic lance adjustable from 450 to 900mm with handy trigger and thumb lock, a 2 metre braided hose and padded shoulder straps for a comfortable fit.

Used for agricultural, commercial, industrial and domestic applications, the lightweight and versatile 'take anywhere' range is ideal for a number of liquid spraying including insecticides, pesticides, fertiliser, weed killer and water.

One great feature is each model includes solvent resistant VITON® rubber seals. Each model is able to spray cleaners and degreasers making the range ideal for automotive purposes such as cleaning vehicles, trucks and motorbikes as well.

These pressure sprayers are constructed from durable HDPE plastic while the larger 15 litre Back Pack Sprayer includes a steel frame.

All models, excluding the back pack, include brass nozzles. All models in the range include spares seals and are covered by the Kincrome equipment 12 Month Warranty.

OUR HISTORY

Kincrome Australia Pty Ltd was acquired by Ron Burgoine in 1987. Kincrome is an Australian, family owned distributor of hand tools and equipment to the automotive, hardware, retail and industrial markets in Australia, New Zealand, Fiji and Papua New Guinea. In January 2005, Kincrome moved to our Corporate Headquarters in Scoresby, Victoria, designed specially to incorporate smart technology solutions and leading edge warehouse management systems.

Our Capacity and Capabilities

Kincrome has seen significant growth over recent years and as a result we have opened two new strategically located warehouses in Queensland and Western Australia

Our Queensland warehouse boasts a distribution facility of 4,000sqm with a capacity to store 4,000 pallets while our Western Australia warehouse boasts a distribution area of 3,000sqm with a capacity to store 3,000 pallets. Both warehouses are strategically located for logistical reasons.

Our Melbourne warehouse and distribution area of 8000sqm boasts storage capacity for 8000 pallets and showcases the latest in Supply Chain Management solutions. Covering an impressive 5000sqm, our external canopy provides protection over our despatch area which features 4 hydraulically assisted container docks, and a truck loading area of 5000sqm for swift transportation of our national orders.

With 10,000 sqm under cover and an expanse of land surrounding the premises, our new Corporate Headquarters provides the facilities required to cater for the operational needs we have today and the capacity for future growth and Development.

Our warehouses showcase the latest in Supply Chain Management solutions. Kincrome's warehouse facilities include technology assisted picking equipment, conveyer driven delivery systems and automated invoicing and freight confirmation processes. Supported by RF (Radio Frequency) units, our Warehouse Management System runs real time data giving access to up-to-date and accurate information.

With over 140 employees Australia wide, Kincrome has sales offices and warehouses in Victoria, Queensland and Western Australia.
