MISSION STATEMENT

At Mack Boots our goal is to look after the foot and lower limb and the world around us. To achieve this Mack Boots is committed to producing innovative occupational footwear designed to complement foot shape and function and match the requirements of the work activity. This is a never ending process of product research, innovation and refinement to ensure that our footwear is the most functional footwear possible. With all decisions we seek to consider the social and environmental factors to contribute to a sustainable future.

SUPPORTING RESEARCH EXCELLENCE

Mack Boots is committed to trying to improve the health and wellbeing of workers by developing innovative footwear that compliments the function of the foot and leg. To reward excellence in health research Mack Boots has established an award at the University of Sydney, Faculty of Health Sciences to acknowledge the exciting work undertaken by emerging health researchers.

NEW INOVATIONS

ULTRA-LIGHT GUMBOOTS

Gumboots have been at the bottom of the footwear food chain for too long. While other styles of footwear have been refined over the years, gumboots have remained unchanged. MACK BOOTS has turned this trend on its head by developing ultra-lightweight, cushioned and supportive gumboots. Many traditional PVC safety gumboots weight in the 1.5kg region while the MACK BOOTS DELUGE with a steel toe and puncture resistant midsole weights half of this at just 775g. The reduction in weight and improvement in function will keep your legs feeling fresh all day.

HI-VIS RANGE

GLOW IN
THE DARK
HEEL CRADLE

REFLECTIVE UPPER

MACK BOOTS reflective and high visibility boots are an exciting innovation in safety footwear and are ideal for those working in low light environments. The range combines High Visibility 3M reflective uppers with a Glow in the Dark stability heel cradle. Unlike Hi-Vis and reflective clothing the Glow in the Dark stability heel cradle ensures that wearers remain visible even when no light source is directed at the worker. MACK Boots Hi-Vis range all contain Composite Toe Caps and are designed on the same lightweight midsole and outsole platform loaded with functional features to help fight fatigue. You can be sure that you will be safe and that your feet will be looked after in a pair of Hi-Vis Mack Boots.

TECHNOLOGY GUIDE

SAFETY TECHNOLOGY

STEEL Toecap

Complies with Australian/New Zealand (AS/NZ S2210), European (EN-ISO 20245) and American standards (ASTM F2413-11).

COMPOSITE Toecap

Lightweight, metal free, airport friendly and complies with Australian/New Zealand (As/NZ S2210), European (EN-ISO 20245) and American standards (ASTM F2413-11).

150°C/302°F Heat Resistant

TPU sole that is hard wearing and highly resistant to hydrolysis, microbial attack, oils, acids and organic fats.

300°C/572°F Heat Resistant

Nitrile rubber sole that is extremely hard wearing and resistant to extreme heat.

Poron® XRD® MetGUARD

Metatarsal guard for extreme impact protection while flexible enough to allow efficient foot function.

WELLMAX® Penetration Resistant

Flexible aramid fibre midsole layer to provide protection without compromising function or weight.

3M HI-VIS

High visibility fluorescent upper which has passed AS/NZS 1906.4:2010 2.3 standard for luminance.

REFLECTIVE

Upper contains retro-reflective material to improve visibility.

GLOW in the dark Heel

Stability heel cradle made from glow in the dark material to ensure that wearers remain visible when no light is directed at the worker.

WATERPROOF

Footwear lined with breathable waterproof AquaDry-Tex®.

H₂O RESISTANT

Footwear designed to shed water.

Anti-Static

Reduces static electricity build up for ultimate safety in high fuel environments.

ZIP Closure

Upper designed for easy access and a quick exit.

Quick Release

Lace loops designed for a quick and easy exit.

ScuffCAP

Improved durability in high wear zones.

SLIP RESISTANT

Sole designed for maximum traction on all types of surfaces.

Low Catch Sole

Low profile sole at the toe to reduce the risk of tripping.

TractionSole

All terrain sole for exceptional grip on loose surfaces.

Ladder Heel

Sole design minimises slipping risk on ladders

FUNCTIONAL TECHNOLOGY

Phylon Midsole

Premium midsole cushioning material for shock attenuation and a smooth ride.

PU Midsole

Polyurethane midsole for cushioning, shock attenuation and a comfortable ride.

EVA Midsole

Cushioned foam for shock attenuation and comfort.

SiliconeGel

Midsole insert to provide additional cushioning and shock attenuation and improve midsole cushioning durability.

Buffalo Leather

Hard wearing leather for tough environments.

Nubuck Full Grain Leather

Top-grain leather that has been buffed to produce a velvet-like surface while providing flexibility, breathability and durability.

Cowhide Full Grain Leather

Highest quality leather that provides the ultimate in flexibility, breathability and durability.

Knitted Polyester Lining

Hydrophobic moisture wicking lining to ensure the skin remains cool and dry.

Cambrelle® Lining

Ultimate lining for comfort, moisture management and durability.

SiliconeGel Innersole

Extra cushioned innersole with additional shock attenuation properties and improved durability.

PU Innersole

Cushioned polyurethane innersole with enhanced durability.

EVA Innersole

Cushioned foam innersole for improved step-in comfort.

TPU Shank

Provides additional midfoot stability and support.

Anti-torsion Sole

Provides additional midfoot stability and support.

Stability Cup

External heel cup to provide additional rearfoot support during the gait cycle.

ForefootFlex

Forefoot flexibility to provide a smooth and efficient toe-off.

HeelBevel

Rounded heel to provide a smooth transition from initial contact to foot-flat.

AnteriorAnkleFlex

Upper design incorporates flexibility at the front of the ankle to allow smoother ankle motion during midstance and uphill walking.

PosteriorAnkleFlex

Upper design incorporates flexibility at the back of the ankle to allow a more efficient push-off. Also improves foot control while driving.

Rake10mm

Heel to forefoot differential of 10mm shifts body mass forward helping to reduce strain on the calf muscles.

THE BODY'S FOUNDATIONS

The human foot is an amazing piece of engineering. Unlike a buildings foundation, feet are required to perform a number of opposing functions while walking, bending and squatting. After heel strike the foot is required to be a flexible adaptor to accommodate uneven terrain and absorb the body's impact forces. Later during single-leg support the foot is required to provide a stable base for the body's centre of mass to progress forward. During push-off the foot produces power and transmits the power generated from the calf muscles to the ground to propel the body forward. To achieve these goals and an efficient walking gait the foot consists of 28 bones, 20 muscles and 33 joints all with unique functions. For footwear to be comfortable the design needs to consider these requirements and the dynamic nature of foot function. Too often traditional safety footwear disregards the functional requirements of the foot and simple treats the foot as a single rigid structure.

Sixty five percent (65%) of wearers of safety footwear have foot problems that are caused by their safety footwear.¹ At Mack Boots we take foot function seriously in order to reduce the number of foot complaints experienced by workers. Mack Boots is committed to producing innovative occupational footwear designs that compliment foot shape and function and match the requirements of the work activity. This is a never ending process of product research, innovation and refinement to ensure that the worker can have the most functional footwear possible.

FOOTWEAR FITTING TIP

When fitting safety footwear take the innersole out of the shoe and stand on the innersole. There should be approximately a 'thumb nail' width between the end of the longest toe and the end of the innersole. Then put the innersole back into the footwear and fit the footwear for width and depth.

M^cGRATH RANGE

THE M^cGRATH FOUNDATION RAISES MONEY TO FUND M^cGRATH BREAST CARE NURSES IN COMMUNITIES RIGHT ACROSS AUSTRALIA AND TO INCREASES BREAST CANCER AWARENESS IN YOUNG AUSTRALIANS. FOR EVERY M^cGRATH BOOT SOLD IN AUSTRALIA MACK BOOTS WILL DONATE \$25.00* AUD TO THE M^cGRATH FOUNDATION TO SUPPORT THEIR BREAST CARE NURSES.

Proudly Supporting

together we can make a difference®

M^cGRATH

The McGRATH combines a 3M reflective upper and a glow in the dark stability heel cradle for the ultimate protection in low light environments. The Phylon cushioned midsole provides shock attenuation and a smooth ride from initial contact until toe-off with improved durability. Forefoot and ankle flexibility allows for an efficient gait, while the reinforced midfoot provides additional support. The rubber outersole provides the ultimate in grip, durability and heat resistance.

EASY ACCESS ZIP

ARMBAR

The ARMBAR combines the benefits of Hi Viz and a Glow in the dark heel with a functional easy access double gusset slip on design. The ARMBAR design incorporates a Poron® metatarsal guard for additional safety and a Composite toecap for weight reduction. The phylon midsole with a cushioned silicone gel insert and silicone gel innersole provides exceptional shock attenuation. The flexible forefoot allows for natural foot motion during push off. The lace free design and multiple colours makes the ARMBAR suitable for the food industry and work places that require area demarcation.

APPROVED STANDARDS

BUDDY

Lance “Buddy” Franklin, Jr

(born 30 January 1987) is a professional Australian rules footballer. Nicknamed ‘Buddy’, Franklin primarily plays as a centre half-forward, but also spends some time in the midfield, where he plays along the wing. Despite his height (196 centimetres or 6 feet 5 inches) and weight (101 kilograms or 220 pounds), Franklin is known for his athleticism, being able to accelerate quickly from his opponents and playing with great endurance. “Buddy” is considered by many including his peers as a Superstar of the AFL competition.

Highlights

- Hawthorn Premiership Player (2008 & 2013)
- 2x Coleman Medallist (2008, 2011)
- 3x All-Australian (2008, 2010, 2011)
- Hawthorn Best & Fairest (2008)
- Hawthorn Best & Fairest Runner-Up (2010)
- 5x Hawthorn Leading Goal Kicker (2007, 2008, 2009, 2010, 2011)
- Phil Manassa Medal for AFL Goal of the Year (2010)
- AFL Rising Star nominee (2008)
- The Deadlys Award for Most Outstanding Achievement in AFL (2007, 2008)

TO ENSURE THAT MACK BOOTS™ ARE CONSISTENTLY OF THE HIGHEST QUALITY STANDARDS, THE MACK BOOTS™ RANGE HAVE UNDERGONE INDEPENDENT TESTING TO ACHIEVE BSI BENCHMARK PRODUCT CERTIFICATION.

WHY CERTIFY YOUR PRODUCTS?

Product certification is a process that confirms a product meets the necessary local, national or international quality standards relevant to a particular product.

Product certification involves an independent, qualified third party assessing a manufacturer's capability to constantly manufacture a product to a recognised standard, such as an **Australian Standard**.

The product certification process involves both assessing the manufacturer's production systems and facilities and selecting representative samples of finished product for testing by independent suitably accredited testing facilities.

Once certified, the manufacturer will be able to display the assessing body's certification trade mark on the products produced, offering objective verification of its compliance. To retain its "certified" status, the certification process requires regular auditing of the manufacturer's facilities and ongoing batch testing of products to ensure that the systems continue to be effective.

The Mack Boots™ range is marked with BSI's Benchmark Product Certification Mark. This indicates that the conformity of our product is based upon technical documentation and an annual review of our manufacturing and quality control process to monitor our ability to consistently produce products in compliance with AS/NZS2210 (AUS/NZ), EN-ISO 20345 (EUR) and ASTM F2413-11 (USA) standards.

This Product Certification Mark is accredited by the Joint Accreditation System of Australia and New Zealand (JAS-ANZ) see: www.jas_anz.com.au/register.

Disclaimer: Every reasonable effort has been made to ensure the accuracy of the product images, model numbers, descriptions and specifications that appear in this brochure. This brochure must not be regarded as an infallible guide. Mack Boots™ accepts no responsibility in this regard. As product details may change from time to time please contact Mack Boots™ to gain the latest information.

*Weight disclaimer. Footwear weights are based on a men's UK8 for a single shoe or boot and a UK 13 for children's shoes. Due to the nature of manufacturing there will be subtle variation between pairs.
