STEP TIP HSS-Co5 (COBALT) STEP DRILLS TiAIN COATED. EXTREME PERFORMANCE AND TOOL LIFE IN HARD MATERIALS.

- HSS-Co5 (Cobalt) Titanium Aluminium Nitride Coated (TiAIN) step drills offer unparalleled performance when drilling hard metals such as stainless steel.
- Step Tip negates the need for a pilot drill in metals and provides extreme drilling speeds in ferrous and non-ferrous metals, plastic and all timbers.
- 1/4" hex shank is ideal for use with impact drivers, quick change adaptors and bit holders.
- 5 Deep Cut Drills - suitable for drilling materials up to 10mm thick.
- 2 Deep Cut Drills with sizes for common tapping diameters.
- Laser marked diameters on each step for fast identification.

HSS BRIGHT FINISH 135° SPLIT POINT DOUBLE ENDED PANEL DRILLS CLAM SHELL 10 PACKS

Panel drills are principally used during sheet metal fabrication to drill holes for rivets. They are designed to drill shallow holes that do not exceed 1.25 x drill diameter. When using double ended panel drills ensure the drill chuck jaws are tight to prevent damage to the back of the chuck.

SABER 3 PIECE COUNTERSINK SETS

For countersinking and deburring in a wide range of materials including ferrous and non-ferrous metals.

90° Cross Hole - 15, 21 & 28mm HSS-Co5 (Cobalt) TiN Coated

- The radially relieved single cutting edge provides fast stock removal with low vibration for chatter-free operation ensuring the smoothest finish.
- These tools are best used as deburring tools, where a burr, or sharp edge, from a previous machining operation needs to be removed for cosmetic and safety reasons.

90° Triple Flute - 16, 20 & 25mm HSS-Co5 (Cobalt) TiN Coated

- The three fluted countersink is self centering with wide flutes and is used to provide a heavy chamfer in the entrance to a drilled hole.
- This may be required to allow the correct seating for a countersunk head screw or to provide the lead in for a second machining operation such as tapping.
